QSR Automations

QSR Automations® provides revolutionary in-store and online guest management solutions to hospitality businesses worldwide. Since 1996, QSR has connected thousands of companies of all sizes and concepts – including table service, quick service, fast casual, deli, bar, concession, pizza, delivery, and other unique environments – to enhanced productivity, improved profit, and maximum guest delight. QSR's innovative software and hardware products – found within the ConnectSmart® Hospitality Automation Solution and ePic® Kitchen Management Solution – focus and capture all activities around the guest to measurably increase efficiency and quality, creating positive and memorable guest experiences each and every visit. From front to back, with QSR you're connected. For more information, visit www.qsrautomations.com or contact QSR at qsr@qsrautomations.com or **502-297-0221**.

QSR ConnectSmart Hospitality Automation Solution

QSR's ConnectSmart Hospitality Automation Solution, which offers innovative technology to manage and capture the entire guest experience, helps operators automate the toughest areas in the hospitality business – those not managed by point-of-sale or backoffice systems. The comprehensive solution provides rich feature sets and high reliability with the added benefits of graphical and web capabilities. The completely integrated, fully customizable ConnectSmart applications include ConnectSmart Hostess for robust seating and wait list management along with ConnectSmart Reservations. QSR's ConnectSmart WebAhead and ConnectSmart WebReserve online applications ensure maximum convenience for guests to enter the wait list or make a reservation via the web. QSR also offers ConnectSmart GuestView to share key information with guests via highly graphical in-store displays. For sophisticated kitchen automation, operators can choose the ConnectSmart Kitchen (CSK) graphical software. Within the ConnectSmart kitchen hardware portfolio are the durable KP-4000™ keypad and powerful eXpert® hospitality controller, along with aesthetically pleasing and cost-effective bracketing solutions. Used separately or together, QSR's ConnectSmart products intelligently connect hospitality businesses to measurable, high quality service.

QSR ePic Kitchen Management Solution

QSR's ePic Kitchen Management Solution is a complete system for advanced kitchen automation, enabling hospitality companies of all sizes and concepts to ensure food quality, reduce costs, and elevate on-site operations. The proven ePic solution offers the open and reliable ePic video controllers – with multiple operating system choices – as well as the robust ePic Kitchen Display Software (KDS) with integrated kitchen alerts. Small to medium, independent, and multi-unit service operators can rely on a streamlined and flexible feature set with the ePic Kitchen Display Xpress (KDX) software. QSR also offers the plug-and-play ePic Direct kitchen video system. The ePic solution is designed to excel in the demanding pace of harsh kitchen environments, providing the unique flexibility operators need to maximize efficiencies, revenues, and guest satisfaction.
